

## Patient home assessment link

The PreViser Comprehensive Assessment has two elements: a patient assessment and a clinical one. Previously the patient assessment could only be completed from reception or in the surgery. Our new update enables you to email patients with the patient questionnaire so that they can complete it from home. This has two benefits:

- It helps you minimise the time your patients spend in the waiting room
- It gets your patients thinking about the impact of their lifestyle on the risk to their oral and general health.

Once completed, your patient's answers will be available for you to access on your Unfinished Assessment page.

The process is as follows:

<p>For an existing patient, access the patient record from your Adult patient list, or create a new patient record</p>	
<p>Click on the button, Copy Patient Home Assessment Link</p>	

Create an email from your usual email platform and paste the link. We suggest you create a standard email into which the link can be inserted

Send  From  To  Cc  Subject

Dear Jenny

We are looking forward to your visit to our practice on XXXX.

In advance of your visit, we would be grateful if you could complete the following questionnaire which, together with information we gather in the surgery, will enable us to perform a PreViser™ assessment of your current and future oral health.

Please click [here](#) to complete the questionnaire.

With best wishes

Liz

The patient clicks on this link and completes the anonymised assessment

Remember that to minimise contact, instead of giving the PreViser report to the patient, you also have the option of emailing it to them as a PDF. If you are following up with patients after their visit, you could then use this opportunity to discuss it with them.
