Practice Management Software Integrations with DEPPA

Carestream DENTAL

CS R4+ Denplan DEPPA Integration

Without requiring a separate log in, you can view previous assessments or start new DEPPA examinations all from the clinical screens in R4+. For the latter, either the appropriate records will be automatically updated or new patient files will be created.

Patients can complete DEPPA questions on an easy-to-use Wacom tablet and receive a print out or an email copy of their examination (which is automatically recorded in the patient's communication tab).

software4dentists

Software for Dentists – Bridge IT

Create Denplan DEPPA assessments from within the Bridge-IT software instead of having to re-enter patient details onto Denplan's own web service. Assessments can then be fully managed within the software.

DentalPlus⁺

Admor DentalPlus

Please contact dentalplus@admor.co.uk for information on their latest release.

If you use Software of Excellence or R4, please find instructions below for importing DEPPA reports into your patient records.
